Taxonomy

Kingdom	Phylum	Class	Order	Family
Animalia	Chordata	Reptilia	Squamata	Lacertidae

Taxon Name: *Acanthodactylus haasi* Leviton & Anderson, 1967

Common Name(s):

- English: Haas' Fringe-fingered Lizard

Assessment Information

Red List Category & Criteria: Least Concern [ver 3.1](#)

Year Published: 2012

Date Assessed: February 9, 2012

Justification:

Acanthodactylus haasi has been assessed as Least Concern owing to its large distribution in central Oman and Saudi Arabia. No specific threats have been reported and this species is not undergoing significant population declines.

Previously Published Red List Assessments

2010 – Least Concern (LC)

Geographic Range

Range Description:

This species is found in central Oman, United Arab Emirates, and northern and eastern Saudi Arabia, around Dhahran and Sakaka (Leviton *et al.* 1992).

Country Occurrence:

Native: Oman; Saudi Arabia

Distribution Map

Acanthodactylus haasi

Range

■ Extant (resident)

Compiled by:

International Union for Conservation of Nature (IUCN), Conservation International, Red List Index (Sampled Approach), Zoological Society London

The boundaries and names shown and the designations used on this map do not imply any official endorsement, acceptance or opinion by IUCN.

Population

There is no population information available for this species.

Current Population Trend: Unknown

Habitat and Ecology (see Appendix for additional information)

This species inhabits deserts and dry shrublands. It is known to climb in low vegetation, which is considered unusual for the genus (Leviton *et al.* 1992).

Systems: Terrestrial

Use and Trade

This species is not in trade.

Threats

It is unlikely that any major threat is impacting this species.

Conservation Actions (see Appendix for additional information)

There are no known species-specific conservation measures in place, or needed for this species. It is unclear whether the species occurs in any protected areas.
