Taxonomy

Kingdom	Phylum	Class	Order	Family
Animalia	Chordata	Reptilia	Squamata	Lacertidae

Taxon Name: *Ichnotropis grandiceps* Broadley, 1967

Common Name(s):

- English: Caprivi Rough-scaled Lizard

Assessment Information

Red List Category & Criteria: Data Deficient [ver 3.1](#)

Year Published: 2010

Date Assessed: June 30, 2009

Justification:

Ichnotropis grandiceps is a rare species and it is unknown whether threats are impacting it. Therefore an assessment of Data Deficient has been made. Further research should be carried out before a more accurate assessment of its conservation status can be made.

Geographic Range

Range Description:

This species is found in the Caprivi Strip and adjacent Botswana and northeast Namibia.

Country Occurrence:

Native: Botswana; Namibia

Population

This species is rare. Searches have been carried out for this species, but it has not been collected in recent years (Branch 1998).

Current Population Trend: Unknown

Habitat and Ecology (see Appendix for additional information)

This species inhabits open woodland and mesic savanna.

Systems: Terrestrial

Threats

It is not known if threats are impacting this species.

Conservation Actions

This species was listed as Secure in Namibia Conservation Status Report (Griffin 1999) but further research is needed into the population numbers and possible threats of this species.

Appendix

Habitats

(<http://www.iucnredlist.org/technical-documents/classification-schemes>)

Habitat	Season	Suitability	Major Importance?
2. Savanna -> 2.2. Savanna - Moist	-	Suitable	-
3. Shrubland -> 3.6. Shrubland - Subtropical/Tropical Moist	-	Suitable	-

Research Needed

(<http://www.iucnredlist.org/technical-documents/classification-schemes>)

Research Needed
1. Research -> 1.2. Population size, distribution & trends
1. Research -> 1.5. Threats

Additional Data Fields

Population
Population severely fragmented: No
